

Hallenreiniger mild-sauer

Workshop & stainless steel cleaner, acidic

The mild, phosphoric acid-based cleaner for all acid-resistant surfaces such as glass surfaces, car wash tiles, stainless steel aggregates, plastic cladding, etc. Limescale, environmental dirt, rust film and other inorganic soiling are removed quickly and thoroughly. Has an extremely good material compatibility. Does not contain hydrofluoric acid, bifluoride or hydrochloric acid and is therefore suitable for use in biological service water systems.

page 1 of 1

Areas of use

Acid resistant materials such as glass, car wash tiles, portals, etc.

Recommendations for use

Depending on the degree of soiling, dilute 1:5 to 1:15 and apply evenly to the pre-wetted surfaces. Work from bottom to top to avoid runners. Allow to react briefly, rework with pad or sponge if necessary and rinse thoroughly with high-pressure equipment. In biological service water systems, use the product sparingly and check the pH value of the service water. If necessary, adjust to a pH range of 7-8 with KocPlus 25%.
